My apologies for the delay, Mr. Couram. I'm sorry your experience at the library was so frustrating. Our public safety officers are there to promote an environment of safety and security by deterring and addressing criminal activity at library locations. If you feel you are being unnecessarily targeted, please do speak with library staff about this concern in the moment. Thank you for using your public library, Mr. Couram.

Subject: Thomas Couram complaint.

I neglected to list some of the complaints, mostly it's simply passive aggressive, however, I had security try to start with me everyday, to the point where I was order to leave my thermos outside.

I've had police come in the library while I'm simply quietly sitting at the computer and stand there and mean mug me for no reason. There are never any disturbances in these libraiories--at least not while I'm there. I have police parading in front of me every other day even though I'm sitting quietly in a corner. I've had people sending me message boxes upon the computer calling themselves my "teacher." I've had police engineer the theft of an old bicycle I had after first parading in front of me which is the usual mode of operandi.

I could go on but I just want to write for the record, I have never in my life committed a crime or caused a disturbance anywhere and I never will because I know this is what is wanted because the effort to destroy or imprison me, is 13 years and counting
